ANNOUNCEMENTS

NEW VPN INTRODUCED; OPEN REMOTE DESKTOP ACCESS TO END APRIL 1 — The Office of Information Technology reminds current legacy VPN users to begin using the new virtual private network. Operation of the legacy VPN service will be discontinued in the coming months. Detailed instructions for using the new VPN service can be accessed at myBama under the Tech tab.

OIT will also begin blocking direct remote desktop access on April 1. From that date forward, remote desktop access from off campus will require a VPN connection. Click on the Tech tab under myBama to learn how to set up VPN and establish a VPN connection before connecting with remote desktop from an off-campus location.

Users will still be able to directly access email through Web mail or on smart phones and tablets, as well as access Banner or any other University public website from the Internet without a VPN-RDP connection. On campus, RDP connections will generally not require a VPN unless regulatory compliance or other University policy states otherwise. If non-UA employees need VPN access, the dean, director or department head should send an email to ITSD@ua.edu to request access.

DID YOU KNOW? — A new document, “UAct: Working together to create an ethical community defined by respect and civility,” has been placed on the UA website at http://www.ua.edu/uact. The document provides UA employees, students and visitors with a list of reporting channels they can use to report incidences of illegal discrimination, harassment, sexual assault, sexual violence, retaliation, threat assessment or fraud. Using information from the site, any UA employee, student, job applicant or visitor who has concerns can seek the assistance of the appropriate University official designated in the UAct document.

UAct was created as part of UA’s commitment to provide a safe environment for employees, students and campus visitors.
